

G20 GLOBAL
LAND INITIATIVE

LET'S TALK LAND

● Live Webinar Series

"Thank you for this great informative session. Looking forward to more!"

— Webinar Attendee

"This was a great opportunity to hear from expert colleagues across Europe, and to share ideas and information. We all have a great deal to learn as we develop best practices for ecosystem restoration."

— Dr Nick Brown

"The proposed EU Nature Restoration Law is a game changer for restoring degraded lands throughout Europe. This will contribute to increasing the resilience of landscapes and people to adverse climate events, including droughts, heatwaves and flooding. The law is likely to have a positive ripple effect far beyond Europe's borders."

— Dr. Karen Sudmeier

EPISODE 1:

The proposed EU restoration law, a game changer in the landscape?

Date: 1st Dec 2022 Time: 15:00-16:30 CET

Guest speakers:

Nick Brown
Principal, Linacre College,
Oxford University

Bettina Doeser
Head of Unit, Natural
Capital and Ecosystem
Health European Commission

Karen Sudmeier
Senior Expert,
Ecology and Disaster
Risk Reduction

Mirey Atallah
Head of UN Decade of
ecosystem restoration
(UNEP)

In June 2022, the European Commission published its proposal for a Nature Restoration Law. It is the first continent-wide, comprehensive law of its kind.

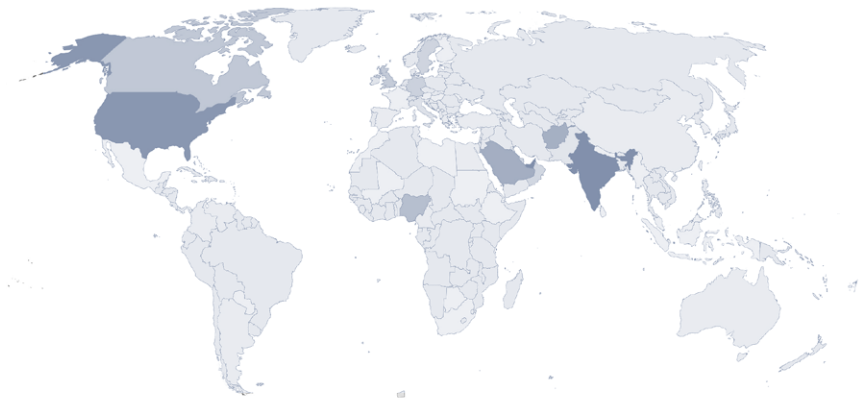

The proposal combines an overarching restoration objective for the long-term recovery of nature in the EU's land and sea areas with binding restoration targets for specific habitats and species. These measures should cover at least 20% of the EU's land and sea areas by 2030, and ultimately, all ecosystems need restoration by 2050.

The law is currently with the European Parliament. Once adopted, it has the potential to be a model legislation for restoration around the world.

This webinar presented the background, key features, and targets of the proposed law. In addition, the speakers presented the potential implication of the law in the context of the decade for ecosystem restoration, and a new push for nature-based solutions for climate change and disaster risk reduction. After the webinar, 64% of the participants reported that the webinar made them aware of the proposed EU restoration law.

List of countries: PARTICIPANTS

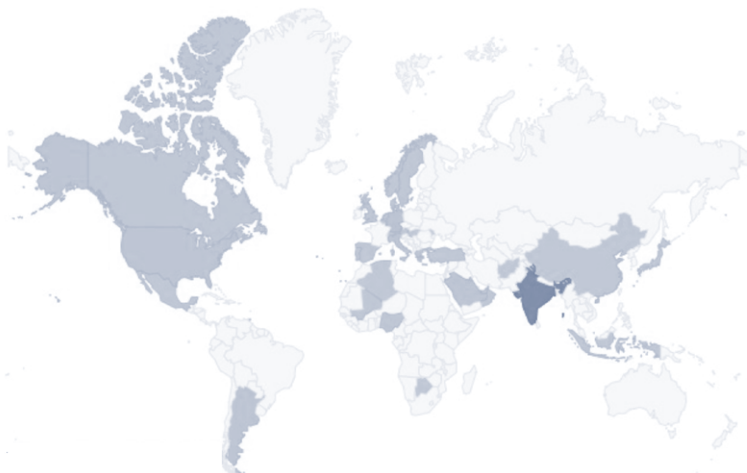

1847 Registrants, from 71 countries
