High-level lunch event:

Getting to One Billion: Scaling up Land Restoration Initiatives

12:00-13:30 UTC+4

Land & Drought Resilience Pavilion

The loss of productive land is a slow, steady and invisible process. At the current pace of land degradation, the international community will need to restore at least 1.5 billion hectares of land by 2030. Restoring more land than is degraded requires a large scale approach. This High-Level event brings countries, organizations and experts together to share policies that promote the best practices and encourage large-scale restoration efforts, in particular.

Unlocking Financial Pathways for Tropical Forest Restoration

14:00-15:00 h UTC+4

Land & Drought Resilience Pavilion

Brazil holds a promising landscape for expanding forest restoration efforts. Restoring 12 million hectares of degraded land is one of the country's commitments under the climate change Convention. Leveraging Brazil's upcoming presidency of the G20 and India's recent presidency, both globally relevant in the field of forests and biodiversity, the panel will also discuss how the G20 Land Initiative can drive restoration efforts in the country. The event is jointly organized with Re.green

03 DEC
//SUN

Private Sector Participation in Global Mine Restoration Activities

14:00-15:00 h UTC+4

Land & Drought Resilience Pavilion

Degraded mines are potential havens for biological diversity. Today, abandoned mines make up over 100 million hectares of potential biodiversity wealth. Discover successful models and case studies of private sector-led mine restoration and the systems that need to be set up to motivate profit-making mining companies to leave behind bio-diverse and recreational spaces in place of wastelands.

Nurturing Roots: The Importance of Integrating Land Restoration in Schools

14:00-15:00 h UTC+4

Land & Drought Resilience Pavilion

Schools are playgrounds for children not only to experiment and fall in love with nature, but where generation after generation can be empowered to combat environmental challenges. This enlightening discussion with practitioners will explore the prospects of nurturing, through schools, a generation of environmental stewards with tools fit for fighting their future environmental crises.

**YouthWave:
Empowering Youth
Ecopreneurs for
Gender-Inclusive Land
Restoration**

16:30-18:00 h UTC+4
Land & Drought Resilience Pavilion

YouthWave is a dynamic event with young ecopreneurs leading and innovating gender-inclusive land restoration. This event spotlights youth empowerment in land restoration. It is hosted by the UNCCD/G20 Global Land Initiative in partnership with the International Trade Centre (ITC). Join this engaging dialogue on collaboration and youth-led land restoration.

LET'S TALK LAND

**Indigenous Perspectives
on Land Restoration,
Conservation, and Rights**

17:00-18:00 h UTC+4
Land & Drought Resilience Pavilion

This is a platform for indigenous cultures to share timeless knowledge and profound insights of land restoration that can lead us towards a more sustainable and harmonious future. Embrace and enjoy transformative discussions and knowledge-sharing.

G20 Global Land Initiative events hosted elsewhere at COP28:

06 DEC
//WED

**Innovation and
technology in climate
change mitigation and
land restoration**

15:00-16:30 h UTC+4
Location: SE room 6

Explore groundbreaking technologies for climate-resilient land at this event. From climate-resilient plants to soil carbon sequestration, discover innovations from WIPO's Green Technology Book's second edition, unveiled for the first time.

//SAT

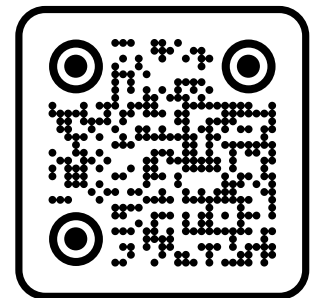

**How to Mobilise Your
Faith Community Towards
Land Restoration**

12:30-13:30 h UTC+4
Location: Faith Pavilion

Belief shapes behavior, and with 85% of the world practicing faith, faith leaders wield significant influence in promoting sustainable development. This event highlights the power of interfaith collaboration for land restoration, featuring leaders sharing core values in our collective responsibility to care for the Earth.

The G20 Global Land Initiative at COP 28

At COP28 will bring some of the world's smartest and most passionate land stewards to Dubai from 30 November to 12 December 2023. The G20 Global Land Initiative has curated topics, events and workshops on land restoration to tap into this treasure trove of ideas through speakers who will inspire and ignite your passion for land restoration. Entry is free! With our survival at stake, our Speakers believe the best knowledge must be accessible to all.

For information, registration and updates on these events, scan QR code or visit: www.g20land.org/cop28-2023. Please note that times and dates may change.
