Date // **4 Dec 2024**

Time // **09:00-10:00 AST**

Location // Blue Zone,
Restoration Pavilion

This side event will explore how Terra at Expo City Dubai demonstrates the power of nature-based solutions in creating resilient urban environments in arid regions. Featuring examples like Terra's biodiverse botanical garden, innovative water management, and community-engaged farming, the session highlights the role of green spaces in promoting sustainability. Through these case studies, Terra inspires global audiences to adopt eco-friendly practices and supports Expo City Dubai's goal of achieving net zero by 2050.
