

Emerging Issues and Technologies in Forest Restoration

© FAO - Luis Tato

Date // **6 Dec 2024**

Time // **14:00-15:00 AST**

Location // Blue Zone,
Restoration Pavilion

Interest in forest restoration is growing due to new incentives and public concern for the environment. However, emerging threats like wildfires and increased food demand pose challenges. Join a session hosted by Environment Defense Fund, UNCCD-G20 Global Land Initiative and World Resources Institute to discuss global forest wildfire trends, technologies for restoration and scaling efforts despite setbacks.
