

Empowering Communities through Citizen Science and Monitoring

© Anh Vu/Greenstorm/UNCCD G20 GLI

Date // **10 Dec 2024**

Time // **16:30-18:00 AST**

Location // Blue Zone,
Restoration Pavilion

The session focuses on the importance of local communities in environmental monitoring through citizen science. It presents the Global Information Restoration Hub (GIRH), based on citizen-collected data worldwide and includes insights from three volunteers. Key topics cover citizen science's impact on monitoring, community training, data collection, successful cases and sustaining community involvement in land restoration.
