Date // **3 Dec 2024**

Time // **11:30-13:00 AST**

Location // Blue Zone,  
Restoration Pavilion

This event highlights soil's crucial role in climate, desertification and biodiversity processes. It showcases how soil impacts climate action, food security and biodiversity conservation, offering guidance for national strategies. With tools like CIFOR-ICRAF's framework, it promotes evidence-based practices, collaboration and inclusive soil management, featuring the Coalition of Action 4 Soil Health as a global cooperation model.
