

# Leveraging Digital Innovations for Effective Land Restoration:

Showcasing Advanced  
Technologies and  
Successful Case Studies

© Freepik

Date // **9 Dec 2024**

Time // **15:00-16:30 AST**

Location // Blue Zone,  
Restoration Pavilion

This event showcases advanced digital tools for land restoration in the face of climate change, deforestation and unsustainable agriculture. It includes earth observation, AI analysis, drone monitoring and blockchain for transparency. Through case studies, it aims to inspire investment in these technologies for better data and decision-making, advancing global land management and restoration goals.
