Date // **10 Dec 2024**

Time // **10:00-11:00 AST**

Location // Blue Zone,
Restoration Pavilion

This session examines how digital transformation is reshaping resource management, focusing on combatting desertification and strengthening water resource management amid climate change. Starting with a technology overview and a practical case study, the session explores policy strategies to enable national hydromet agencies to modernize their services. A panel with international, private, and government representatives will discuss capacity-building for land and water management, offering insights into digital solutions for climate adaptation.
