Embark on a journey where sustainability and innovation converge, revealing transformative initiatives that resonate within conservation and eco-conscious education. Witness the progression towards a greener, more sustainable future through pioneering efforts in ag-tech, wildlife preservation, and sustainable schooling.

**Andres Bisoño Leon**  
SOS Carbon

**SOS Carbon**, a MIT spin-off, innovates ag-tech solutions at the oceans-seaweed-fertilizers nexus. **Converting sargassum invasion into value chains**, they disrupt chemical agriculture sustainably in the Caribbean and USA regions.

**Brinda Dewan**  
School Kitchen Gardens

In 2018, Nepal initiated the **Green School Guideline** for sustainable practices. Wildlife Conservation Nepal aided in its creation, focusing on **eco-friendly school frameworks and environmental education**.

**Vijo Varghese**  
Our Land

**Our Land** preserves an elephant corridor and operates a snake rescue center. Conservation drives **community engagement in habitat protection, wildlife restoration, conflict resolution, and eco-tourism** through education.

**Fernando De Lucca Moreno**  
CERES Seeding

**Ceres Seeding** merges tech with ecological restoration, scaling up ecosystem recovery, providing **sustainable solutions** such as mapping, seed planting, and monitoring for environmental restoration projects.
